## **Rules Of Magic**

There are 3 rules of magic.

### **Never tell the secret.**

If you reveal the secret people are no longer surprised. The magic is in the surprise.

Besides that when people find out how it is done sometimes they feel stupid because the trick is so simple. Since magic is suppose to make people feel good we don't want to tell the secret and make them feel bad.

### **Never Do The Same Trick Twice.**

If you do the same trick again the surprise is gone because they know what is going to happen. Since the surprise is gone the magic is gone. If they know what is going to happen they are looking for how you do it.

### **Practice, Practice, Practice**

If you don't practice you could do the trick poorly. If you do the trick poorly no one will want to see more of your magic because it was not fun. Plus if you do the trick poorly you could accidentally show how the trick is done and then the magic is gone.
